

Eureka Discovery Service and Microservices Registration

1. Eureka Discovery Server

Eureka Server is a service registry used in microservices architecture.

It stores information about available microservices.

Important annotations:

@EnableEurekaServer - Creates Eureka Discovery Server.

@EnableDiscoveryClient - Registers a microservice with Eureka.

2. Eureka Server Configuration

application.properties

server.port=8761

eureka.client.register-with-eureka=false

eureka.client.fetch-registry=false

3. Eureka Server Main Class

@SpringBootApplication

@EnableEurekaServer

```
public class EurekaDiscoveryServerApplication {  
    public static void main(String[] args) {  
        SpringApplication.run(EurekaDiscoveryServerApplication.class,args);  
    }  
}
```

4. Microservice Registration

Account/Loan service configuration:

spring.application.name=account-service

eureka.client.service-url.defaultZone=http://localhost:8761/eureka

Main class:

@SpringBootApplication

@EnableDiscoveryClient

```
public class AccountApplication {  
    public static void main(String[] args) {
```

```
SpringApplication.run(AccountApplication.class,args);  
}  
}
```

5. Startup Order

1. Start Eureka Server (8761)
2. Start Account Service
3. Start Loan Service

Eureka Dashboard:

<http://localhost:8761>
